Summary

Software Frontend Engineer with 2+ years of commercial experience building scalable web applications using React, TypeScript and NextJs,. Experienced in developing complex user flows, integrating with APIs, and delivering user-focused features. Strong background in cross- functional collaboration and effective communication with designers and backend engineers. Previously led a technical support team, bringing strong problem- solving skills, ownership mindset, and ability to work under pressure

Experience

Liber Save | Remote

Frontend Software Engineer | 11/2024 - Present

- **Reduced merchant onboarding time** by developing a scalable file import system using **React, TypeScript, Redux Toolkit**, supporting Excel and Google Sheets with validation, reusable UI components, and real-time feedback.
- **Improved frontend-backend integration** by designing and implementing **RESTful API** interactions, optimizing data flow, and collaborating with backend engineers on API contracts and data processing logic.
- **Improved code quality and maintainability** by developing reusable React components, documenting technical solutions, participating in **code reviews**, and following modern frontend architecture and best practices.
- **Implemented custom charts** in the admin panel using the charts.js library.
- **Improved application performance** by optimizing bundle size, configuring and troubleshooting **Webpack** builds, ensuring cross-browser compatibility, and applying frontend performance optimization techniques.
- **Improved development efficiency** by collaborating daily with designers, backend developers, and product stakeholders in a distributed remote team to deliver production-ready features.
- **Built and maintained** a dedicated **NestJS** email microservice with reusable React email templates, reducing duplicated logic across transactional email workflows.

PROJECT HIGHLIGHTS

- Built a scalable file import system supporting production merchant data with validation, parsing, and edge-case handling.
- Developed reusable frontend architecture using **React, TypeScript, Material UI, Redux Toolkit**, and component-based design principles.
- Collaborated daily with designers, backend developers, and product stakeholders in a fully remote environment.
- Worked with **CI/CD** workflows, Git-based development, documentation, and production deployments.

Stack: NextJS, React, Redux TK, I18next, Material UI, NestJS

Saule IT Services | Tallinn, Estonia

Sports Betting Operations & Risk Control Specialis | 04/2023 - 11/2024

- Investigated real-time production incidents affecting business-critical systems, identifying root causes and coordinating issue resolution.
- Maintained operational stability by monitoring live systems, validating data integrity, and responding to incidents under strict SLA requirements.
- Collaborated with technical and support teams to troubleshoot complex production issues while managing multiple concurrent investigations.
- Prevented more than €50,000 in potential losses through timely detection and investigation of abnormal system behavior.

Skills

Frontend: React, Next.js, TypeScript, JavaScript ES6, HTML5, CSS3

UI & Architecture: Material UI, Redux Toolkit, Zustand, Storybook, Responsive Design, Component-Based Architecture

API & Backend Integration: RESTful API, API Integration, Swagger, Postman, Node.js, NestJS

Other: Internationalization(i18n), StoryBook, Postman, Swagger

Tools: Webpack, Git (Gitlab), Docker, CI/CD

Quality: Playwright, End-to-End Testing, Code Reviews, Technical Documentation, Performance Optimization

Education

Estonian Entrepreneurship University of Applied Sciences | Tallinn, Estonia
Web Technology | 06/2025

Languages

- English (Advanced)
- Russian (Proficient)
- Spanish (Elementary)
